GENERAL INDEX

A

Abscission of stem in Mirabilis affected by growth-regulating substances 420

Acuña, J. B., Varieties of kenaf (*Hibiscus cannabinus*), a bast fiber plant, in Cuba 349

Addicott, F. T., Some anatomical effects of moisture stress in nursery seedlings of guayule 208

Aerosol form of growth-regulating substances, effect in fruit-set in tomato 108

After-ripening treatment of peach seeds 431

Alga, brown, reproductive structures 290

Algastatic agents, effect on Marchantia 472

Auxin, rapid extraction method 440

Avicenniaceae, geographic distribution 158

B

Beal, J. M., Effect of indoleacetic acid in inhibiting stem abscission in Mirabilis 420; Further observations on the telemorphic effects of certain growth-regulating substances 165; book reviews 130, 246

Beans, affected by growth substances 124; geotropic reactions 440

Benedict, H. M., Effect of light and nutrient supply on growth and production of rubber and seeds by guayule 83; Growth, rubber storage, and seed production by guayule as affected by boron supply 148; Rubber content, stem anatomy, and seed production in guayule 341

Bennett, H. W., Embryology of Paspalum dilatum 40

Blomquist, H. L., Development of reproductive structures in the brown alga, Turbinaria turbinata 290

Bonner, James, Toxic substances from the culture media of guayule which may inhibit growth 185

Boron supply, effect on growth of guayule 148

Bouteloua, photoperiodic responses 46, 382

Bowenia, shoot apex 26

Brooks, S. C., "The permeability of living cells" 489

Brown, S. W., Development in larkspur 103

Browne, C. A., "A source book of agricultural chemistry" 246; "Thomas Jefferson and the scientific trends of his time" 246

C

Carlson, R. F., Morphological changes in peach seedlings following after-ripening treatment of the seeds 431

Changes in the organic-acid content of Valencia oranges during development 140

Chlorine accumulation in date palm 179

Chrosomal behavior in Lolium 304

Chrysothamnus, floral morphology 451

Colchicine, reaction of maize 483

Conifer leaves, structure affected by habitat 12

Cooper, W. C., Vegetative propagation of Derris and Lonchocarpus with the aid of growth substances 1

Crane, J. C., Varieties of kenaf (Hibiscus cannabinus), a bast fiber plant, in Cuba 349

Cryptostegia, rubber hydrocarbon and a crystalline isolated fraction 333

Cytohistology of the reaction of maize seedlings to colchicine 483

Cytology and breeding behavior of selected plants of Poa pratensis 357

D

Date palm, chlorine accumulation 179

Davis, F. F., Relation of temperature to the selective herbicidal effects of 2,4-dichlorophenoxyacetic acid 463

Delphinium, form sequence in leaves 103

Derris, vegetative propagation affected by growth substances 1

Dichlorophenoxyacetic acid (2,4), effects on fruit ripening 199; as a differential herbicide 224, 232, 463

Dipteris, gametophyte 402

Dormancy of tung buds 215

E

Eaton, S. V., book reviews 130, 489

Effects, of algastatic agents on Marchantia 472; of dichlorophenoxyacetic acid (2,4) on fruit ripening 199; of indoleacetic acid on stem abscission in Mirabilis 420; of isosmotic concentrations of inorganic and organic substrates on entry of water into corn roots 131; of moisture stress in guayule seedlings 208

Embryology of Paspalum 40

Encephalartos, shoot apex 26

F

Floral morphology of Chrysothamnus 451

Fluorescein, effect on growth of beans 124

Fogg, J. M., "Weeds of lawn and garden" 489

Form sequence in larkspur leaves 103

Frazier, J. C., Nature and rate of root system of Gonolobus 324; Second-year development of root system of Apocynum 332

Fungistatic action of diphenyl on citrus fruit pathogens 74

G

Galston, A. W., Toxic substances from the culture media of guayule which may inhibit growth 185

Gametophyte of Dipteris 402

Garrett, S. D., "Root disease fungi: Vol. I" 356

Geographic distribution of Verbenaceae and Avicenniaceae 158

Geotropic reactions of sugar-cane nodes 440

Gilman, J. C., "Manual of soil fungi" 356

Glenister, P. R., Effects of iron deficiency on respiration of sunflower 33

Gonolobus laevis, root system 324

Gramineae, leaf and bud initiation 269

Grasses, photoperiodic responses 46, 382

Green, J. M., Cytohistology of the reaction of maize seedlings to colchicine 483

Growth-regulating substances 1, 108, 124, 165, 199, 215, 224, 232, 420, 440, 463, 483

Guayule, affected by boron supply 148; affected by light and nutrient supply 83; effects of moisture stress on seedlings 208; toxic substances from culture media 185; vegetative growth and rubber content 341; winter hardiness 95

H

Haas, A. R. C., Chlorine accumulation in date palm varieties 179

Habitat, effect on structure of conifer leaves 12

Hamner, C. L., Application of growth-regulating substances and fruit-set in tomato 108; Selective herbicidal action of 2,4-dichlorophenoxyacetic acid 232

Hayward, H. E., Effects of isosmotic concentrations of inorganic and organic substrates on entry of water into corn roots 131

Heiberg, B. C., Fungistatic action of diphenyl on citrus fruit pathogens 74

Helianthus, respiration 33

Herbicidal action of 2,4-dichlorophenoxyacetic acid 224, 232, 463

Hereditary factors in onion 411

Hibiscus cannabinus, varieties 349

Hummer, R. W., Inverse correlation between rubber hydrocarbon and a crystalline fraction isolated from latex of Cryptostegia 333

I

Inbred lines and F_1 hybrids of tomato 247

Inhibition of growth of guayule 185

Iron deficiency in sunflower 33

Ivanoff, S. S., Hereditary factors in Bermuda onions 411

J

Johnson, M. A., Zonal structure of the shoot apex in Encephalartos 26

K

Kenaf, a bast fiber plant 349

Kraus, E. J., book reviews 130, 246, 355, 489

L

Light, effect on production of rubber by guayule 83

Link, G. K. K., book reviews 356

Lolium perenne, meiosis in autotetraploid 304

Lonchocarpus, vegetative propagation affected by growth substances 1

M

Macrozamia, shoot apex 26

Maize seedlings, reaction to colchicine 483

Marchantia affected by algastatic agents 472

Marth, P. C., Application of growth-regulating substances and fruit-set in tomato 108; Dichlorophenoxyacetic acid (2,4) as a differential herbicide 224; Effects of 2,4-dichlorophenoxyacetic acid on ripening of detached fruit 199; Relation of temperature to the selective herbicidal effects of 2,4-dichlorophenoxyacetic acid 463

Meiosis in autotetraploid Lolium perenne 304

Method for rapid extraction of free auxin 440

Minor elements, review of literature references 130

Mirabilis, stem abscission 420

Mitchell, J. W., Dichlorophenoxyacetic acid (2,4) as a differential herbicide 224; Effect of light and nutrient supply on growth and production of rubber and seeds by guayule 83; Effects of 2,4-dichlorophenoxyacetic acid on ripening of detached fruit 199; Growth, rubber storage, and seed production by guayule as affected by boron supply 148; Rubber content, stem anatomy, and seed production as related to rate of vegetative growth in guayule 341; Winter hardiness in guayule 95

Moisture stress in guayule 208
